The Digital Economy and Society Index (DESI) 2016

The DESI is a composite index that summarises relevant indicators on Europe's digital performance and tracks the evolution of EU member states in digital competitiveness.

Its 5 principal dimensions are:

- A Connectivity
- B Human Capital
- C Use of Internet
- D Integration of Digital Technology
- E Digital Public Services

Each score in the DESI is between 0 and 1, with higher values representing better performance.

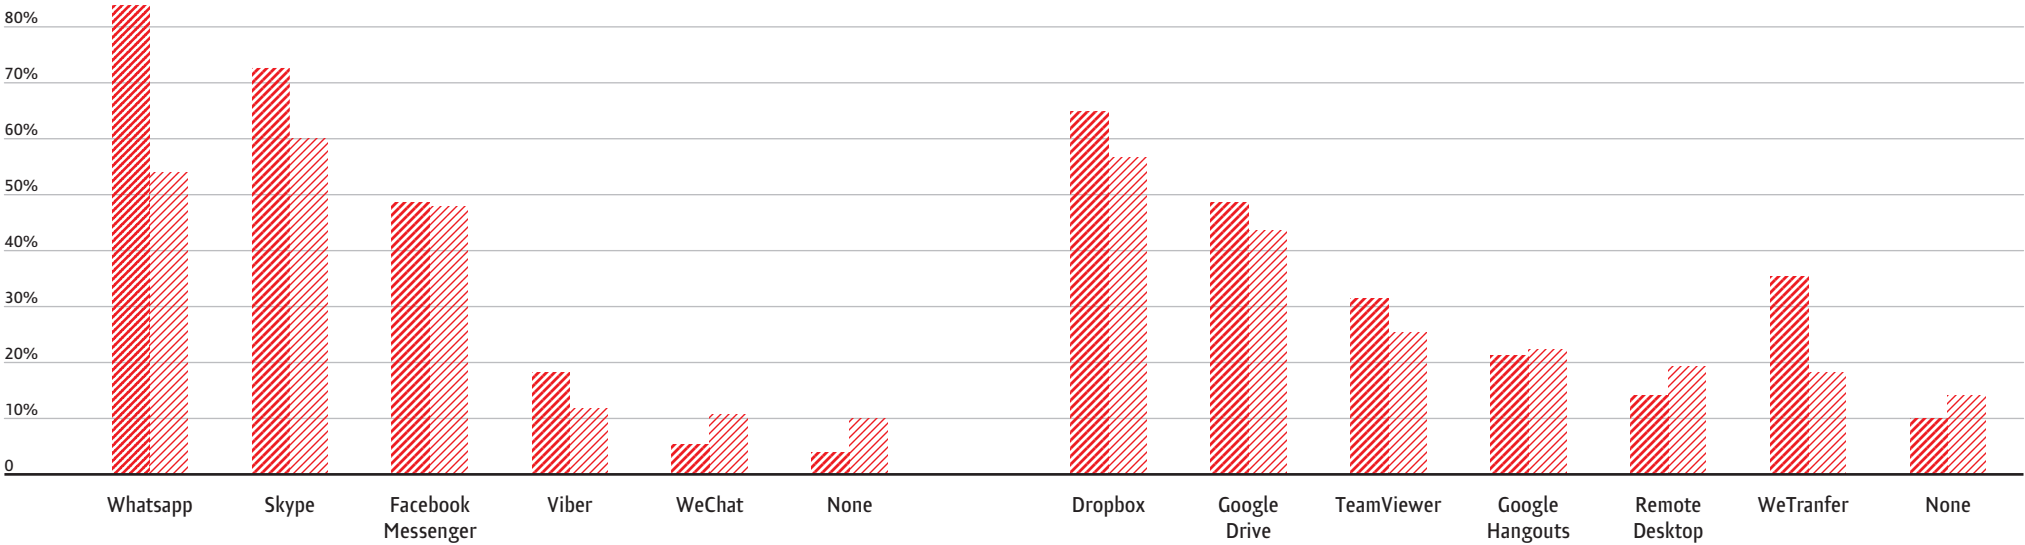

Italian Jobs Are Getting Smarter

Even if Italy is one of the last countries in the DESI ranking, the use of file sharing and instant messaging tools is gradually spreading between Italian workers.

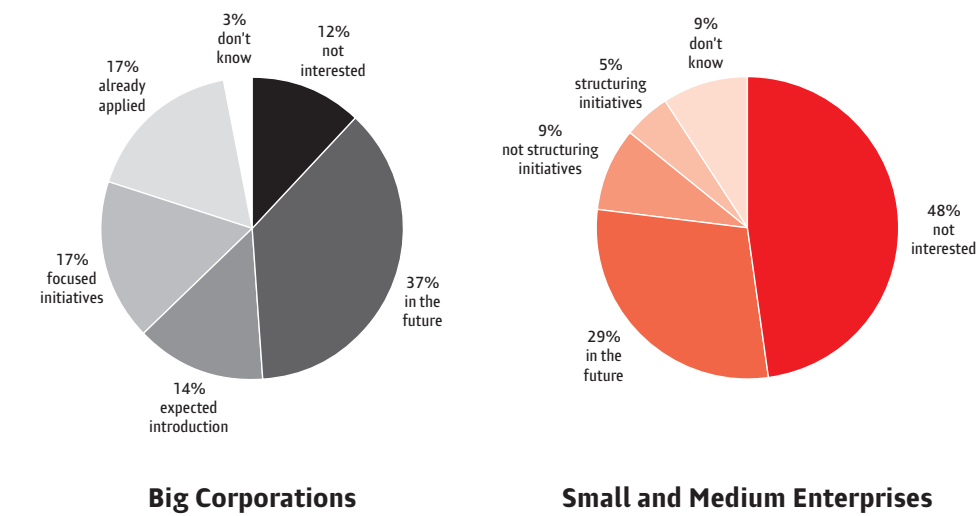

Italy Other countries

New types of messaging platforms make communication and workforce productivity more efficient.

The most used communication tools are those of instant messaging and VoIP: they represent the real revolution, reducing time, allowing the connection of people and the sharing of interests and knowledges.

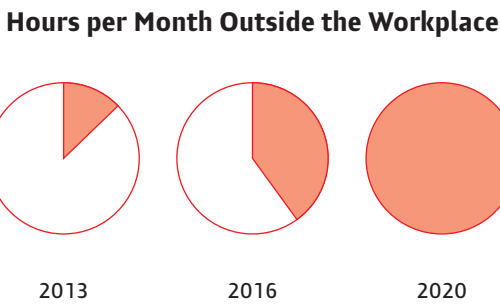

Interest in Smart Working, Italy

The Turning Point of Barilla

Barilla began its smart working program in 2013, allowing some of its employees to work at home the 13% of their total hours per month. Currently the program has been extended to 1,200 employees, that can work 40% of their hours per month outside the workplace. Barilla aim to include all its employees to the program by 2020, letting them work any time they want outside the workplace.

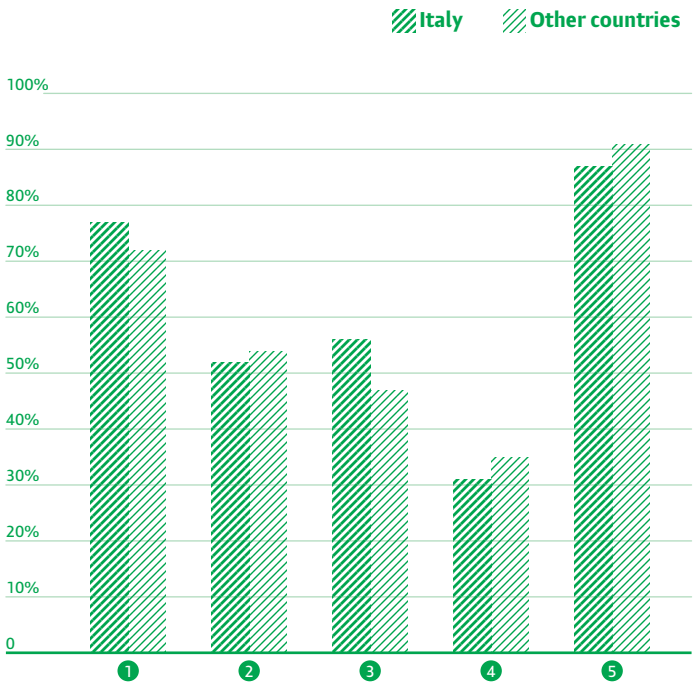

Security

Italy is the third most-at-risk country in Europe in terms of security measures for mobile devices.

A study conducted on 11,500 professionals from 23 countries reveals that:

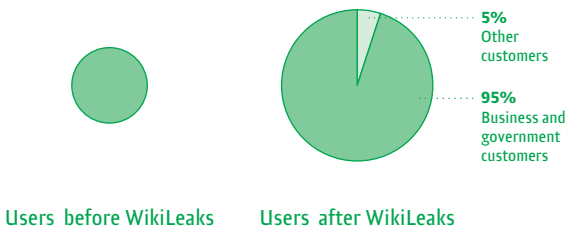

- 1 They're autonomous in solving problems
- 2 Technologies have increased productivity
- 3 Technologies disobey to their inputs
- 4 They've lost data due to incorrect handling
- 5 IT department is in charge of their own security

Silent Circle

Silent Circle is a secure communications company. After Wikileaks (2013) the number of users got four time bigger. 95% of subscriptions comes from business or government customers with negotiated contracts.

The Number of Users' Growth
